# Chardon Township Sewer Project - Survey

The Geauga County Department of Water Resources (GCDWR) will be mailing out an income survey to all Berkshire Hts – Chardon TWP residents impacted by the wastewater treatment plant and sewer line construction. As residents are aware, the project costs are significant and in an attempt to offset or reduce resident's assessment fees, GCDWR is pursuing Federal grant funding through the Ohio Development Services Agency. To qualify for the grant funds we have to conduct a "Low- and Moderate-Income Survey."

The surveys will be mailed on or about 3/13/19. It is critical that you follow instructions, complete the survey and return it to this office as soon as possible. If you prefer, you may come to our office at 470 Center Street, Building #3 to fill out a survey.

The location for the WWTP has been tentatively identified below, as well as the sewer lines (please note: plan is not final).
