Ref: Sewer construction along Henning Drive between Thwing Rd and Howard Drive

Dear Homeowner,

You have probably noticed the construction activity along Thwing Road; this is part of the Chardon TWP Wastewater Treatment Plant and Sewer Project. TRAX Construction is making good progress based on the good weather conditions we are experiencing currently. Work on the Henning Drive sewer line will begin on Friday, 11/13/20.

This work will start with a pit excavation at the southern end of Henning Road, at Thwing Road, and slowly move northward towards Howard Road. Three manholes will be placed along with the sewer line. No work is planned on the lateral connections during this phase. Please remember that the deadline to relocate the lateral for your home is Friday, 11/13/20. Construction work at this time will be focused only on the sewer main running down Henning Drive.

While there will be access for residents on Henning Drive, the street will be closed to through traffic until this portion of the work is complete. We are estimating two weeks' worth of construction in this phase on Henning Drive. GCDWR and TRAX Construction realizes the short notice of this letter, but the exceptionally good weather has allowed the project to move forward a bit more quickly, and we are taking advantage of this before winter sets in.

Please feel free to contact Mike Kubrin at 440.279.1984 or mkubrin@gcdwr.org, or our office at 440.279.1970 should you have questions. We strive to keep the community current on all activities, and continue to use our website, www.gcdwr.org, to post updated information.

Respectfully,

A handwritten signature in blue ink, appearing to read "S. Oluic".
