For detailed instructions CLICK HERE!

PWS Name:	Geauga County Bainbridge Water
PWS ID:	OH2804003

Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the RED shading are required by the LCRR and/or Ohio EPA. The BLUE columns are recommended. Informational notes for columns are in Row 12; Worksheet examples are included in rows 14 &15. This template is formatted for approximately 10,000 rows. The +/- button in the lefthand margin can be used to hide and unhide the PWS Information Box.

Press the +/- button to display or				Location Information					System-Owned Portion											Customer-Owned Portion								Other Potential Sources of Lead		Additional Information to Assign Tap Monitoring Tiering							Lead Service Line Replacement (LSLR)		Comments
Unique Service Line ID	Site Name	Street Number	Street Name	City	Zip Code	County	Latitude	Longitude	System-Owned Portion Service Line Material Classification	If Non-Lead in Column O...		Is the Service Line Metered	Service Line Use	Service Line Size	Service Line Length	Basis of Material Classification	Was the Service Line Material Field Verified?	If Yes in Column W...		Customer-Owned Portion Service Line Material Classification	Service Line Installation Date	Service Line Size	Service Line Length	Basis of Material Classification	Was the Service Line Material Field Verified?	If Yes in Column AE...		Connector Material Type	Is there Lead Solder in the Service Line?	Building Type Connected to Service Line	If Column AJ includes a school...	Building Construction Date	Building Plumbing Materials	Plumbing installation/replacement	Point-of-Entry or Point-of-Use	LCR Sampling Point ID	Date of System-owned LSLR	Date of Customer-owned LSLR	
										Was Material Ever Previously Lead?	Service Line Installation Date							Describe the Field Verification Method	Enter the Date of Field Verification							Describe the Field Verification Method	Enter the Date of Field Verification				Lowest Grade Served								
A Unique ID by the public water system for each service line.		Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.							If "Non-Lead Other", describe in Comments field	Important for determining if service line requires replacement	Estimated date when the service line was installed or replaced	Service Line Metered or Not Metered	Drinking, Non-Drinking, Combination	Diameter in inches	Length in Feet	Select option from drop down list. If "Other," describe in the Notes field		If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated	If "Non-Lead Other", describe in Comments field	Estimated date when the service line was installed or replaced	Diameter in inches	Length in Feet	If Other, describe in the Notes field		If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated	For example, lead gooseneck or pigtail where the water main is connected to the service line		This information may be helpful for identifying lead tap monitoring locations.									Please use this section to record any comments or notes associated with a service line.
